PROFILE

Detail-oriented Web Developer and Information Technology graduate with full stack experience developing responsive, secure, and maintainable web applications using React, TypeScript, Node.js, Laravel, Tailwind CSS, and MySQL. Currently an IT Staff at PT. Inoac Polytechno Indonesia, delivering an enterprise real-time stock monitoring platform. Proven track record with real-world systems, including a live online admission (PPDB) portal, a school management platform, and a public service queue management system.

WORK EXPERIENCE

IT Staff (Maganghub Internship Program) August 2026 – Present

PT. Inoac Polytechno Indonesia, Karawang, West Java, Indonesia

- Developed an enterprise real-time stock monitoring platform for PT. Inoac Polytechno Indonesia Plant #2 using React, TypeScript, Vite, and Tailwind CSS, replacing manual spreadsheet records and consuming centralized REST APIs.
- Built dynamic operational data visualizations with Recharts and dedicated Shop-Floor TV Displays for plant-wide wall monitors.
- Delivered instant Plan vs Actual metric visibility, accelerating Finish Good stock reconciliation and streamlining daily coordination across PPIC, Warehouse, and Logistics.

Web Development Intern November 2025 – December 2025

Bantul Regency Department of Communications and Information Technology

- Developed a Public Service Queue Management Web Application that streamlined queue monitoring and counter management for public service officers.
- Improved data accuracy and user experience by implementing real-time updates via WebSocket and robust form validation.
- Maintained a clean and scalable codebase using feature-based architecture, enabling easier future development.

Laboratory Assistant - Database Implementation September 2024 – February 2025

Muhammadiyah University of Yogyakarta, Indonesia

- Assisted students during practicum sessions and explained core database concepts.
- Evaluated student assignments and practicum reports.

PROJECTS

Website TKQ An-Naurah Islamic School - Full Stack Web Developer July 2026 – September 2026

Karawang, West Java, Indonesia

- Developed and deployed a responsive School Portal and Online PPDB system using React, Vite, Tailwind CSS, Express.js, and MySQL, hosted on Cloudflare Pages and Railway, digitizing the end-to-end student admission process.
- Engineered a secure REST API with JWT authentication and Helmet protection, plus a file upload pipeline with binary file validation, automatic image-to-WebP conversion, and URL-based storage to keep the database lightweight.
- Implemented role-based dashboards for administrators and parents, featuring real-time application tracking, automated email notifications, and seamless migration of approved applicants into student records.

Final Project - Full Stack Web Developer February 2026 – April 2026

Muhammadiyah University of Yogyakarta, Indonesia

- Developed a School Management Web Application that digitized administrative processes including student data, scheduling, and grade management for MIM Troketon.

- Enabled parents to enroll students online through a digital PPDB system, reducing manual registration workload for school staff.
- Ensured system reliability and usability through Black Box Testing and System Usability Scale (SUS) evaluation.

Learning Platform (MateriKu) - Full Stack Web Developer May 2025 – June 2025

Muhammadiyah University of Yogyakarta, Indonesia

- Developed a web-based learning platform that centralized material distribution, assignment management, and class discussions in one system.
- Enabled structured access for Admin, Teacher, and Student roles, ensuring each user only interacts with relevant features.
- Streamlined the authentication flow using Laravel Breeze, improving security and ease of access for all users.

Movie Website (Cloud Hotstar) - Frontend Web Developer August 2024 – September 2024

Muhammadiyah University of Yogyakarta, Indonesia

- Developed a movie discovery platform that allows users to search, browse by genre, and explore detailed movie information including cast and trailers.
- Delivered a smooth and engaging user experience through responsive design and fluid animations using Framer Motion.
- Integrated Supabase for user authentication, enabling personalized access and secure data management.

Landing Page (Canela Dessert) - Frontend Web Developer August 2024 – September 2024

Muhammadiyah University of Yogyakarta, Indonesia

- Designed and built a responsive multi-page static website that effectively presents the brand identity of a dessert business.
- Enhanced user engagement through visual effects and an intuitive page structure covering Home, About, and Contact.
- Implemented JavaScript form validation and deployed the site to GitHub Pages for public accessibility.

EDUCATION & ORGANIZATIONAL EXPERIENCE

Bachelor Degree in Information Technology | Software Engineer September 2022 – April 2026

Muhammadiyah University of Yogyakarta, **GPA: 3.85/4.00**

Member, KMTI (Student Association) - Arts, Culture & Sports Division November 2023 – July 2024
